**Create:**
- (1-1) A blank page with a button.
- (1-2) A modal that pops up when that button is clicked.

Modal wireframe. (* for reference only. Feel free to add your own flair)

The modal should contain two panes side-by-side.
- (10-2) Left pane shows the coupon code details.
- (11-2) Right pane shows an email subscription form.

Modal must include these features,
- (12-1) X close button that hides the current modal.
- (2-1) Logo image of the store the coupon is for.
- (2-1) Title of the coupon.
- (2-1) Description of the coupon.
- (3-1) Text box to display the coupon code.
- (4-2) Button that copies the coupon code to the user's clipboard.
- (2-1) Image icon that represents an email subscription form.
- (2-1) Title for email subscription form.
- (2-1) Text highlighting the benefits of subscribing.
- (5-1) Text box for user's email address.
- (6-2) Button that submits the form.

- (7-2) POST request to an api endpoint.
- (8-2) Success or errors are reflected on form.
- (9-3) BONUS: add retries upon failure up to 2 times. Throttle each retry.
